

RBC SERVICES UPDATE

RBC Services
Division of McNish Corporation

Phone: 630-264-5241 Fax: 630-892-7951

IMPORTANT ANNOUNCEMENT

Special Issue

As Of 18 JUN 09, RBC Services Became A Division Of McNish Corporation, And Will Work In Cooperation With Walker Process Equipment

RBC Services will still be here to answer all your questions and assist you with any RBC related concerns you may have. In addition, we will also be able to make available new and replacement equipment for other unit processes in operation at your facility.

Walker Process has been in the RBC business for over 30 years. Their EnviroDisc model RBC - which was featured in the Issue 1, 2009 UPDATE, has been manufactured by Walker for over 20 of those years. Having personally worked with RBCs of all types and manufacture for over 30 years, it is my opinion that the EnviroDisc is the best RBC in today's market, with no difficulties reported from the field.

Having a new relationship with Walker, I plan to attend as many annual wastewater operator conferences as possible. Once the schedules are set in the various states for those I plan to attend, I will contact you to see if you will also plan to attend. We can meet at the booth with the company which represents Walker Process Equipment in your area.

I look forward to continuing my full support of RBC owners and operators and maintaining the efforts which have created the good working relationships that RBC Services has established with you over the years.

My contact numbers will remain the same. As always, if you have any RBC related questions or concerns, you are welcome to give me a call. RBC Services is here to serve you.

Thank you.
